

Project Instructions

1. Project Submission Requirements

SN	Description	Submission type	Submission
1	Project Design Report	Softcopy via LMS	Week 6
2	Interim Review	Demo project progress during the lab session	Week 15
3	Demo and Report Submission	Project demo/interview Upload the program source code and report softcopy together (LMS)	Week 17

Note:

1. The project report templates are provided in the LMS. You must complete all the details on the cover page of the templates. All drawings and designs are to be created using IT Tools. No handwritten and/or hand sketched submissions will be accepted.
2. Project reports submitted late will receive a penalty on the marks awarded for the work. Work submitted late, but within 3 calendar days of the stated deadline, will be awarded **80%** of the marks. Work submitted later than 3 calendar days of stated deadline, will be awarded **0** mark.
3. Only online submission of work is accepted. If you have a valid MC/LOA on the day of the deadline, you are still expected to submit your (partial) work online. No penalty will be imposed if the online submission is received on time.

2. Project Assessment

See attached Rubric.

3. Project Design Report (Group, 10%, 20 marks)

The design report submission is via LMS. The following should be included in your project design report:

A. Project Objectives

State objective of the project.

B. Project Design & Discussion

- Use Case Diagrams
- Domain Class Diagram
- Work Distribution

C. Conclusion

State problems encountered, lessons learned and plan for next stage.

4. Interim Review (Individual, 15%, 30 marks)

During the Interim Review, the group will demonstrate/show the following items:

- Class diagram (including GUI classes based on MVC model)
- Working code for the Basic Features such as Create, Read, Update and Delete (CRUD) as stated in the project requirements. (Module 1a or 1b)
- Storyboard/GUI design

5. **Demo, Integration, Report and Code Submission (Gr/Ind, 25%, 50 marks)**

Demo:

The group will demonstrate their project to the lecturer. Students will be assessed on the project integration (group work), individual work and individual understanding of the technical details. Refer to Project Rubric for more details.

Project Report:

The project report (PPT) submission is via LMS.

The following should be included in your report:

A. Project Objective

- State objective of the project

B. Project Design & Discussion

- Finalized Class Diagram
- Final Story Board (using screenshots of the program run)
- Work distribution

C. Conclusion

- State if the project objectives were met.
- Explanation/reasons for not meeting the objectives.
- State the limitations of your program, if any.
- State the two most important things you learned about OOP in this project.

Source Code Submission:

- To be submitted in the LMS directly after the interview with your Lecturer.

6. **Other Project Requirements**

The GUI should resemble what is described in the project specifications. Any changes and improvements should be approved by the Lecturer.

7. **Warning**

Students are supposed to submit their **own work** and not plagiarize any parts of project from fellow classmates or some other sources.

Consequences of plagiarism:

Plagiarism is a serious offence. If a student found to have committed or abetted the offence of plagiarism in relation to the submitted work, disciplinary action will be enforced. Refer to the Temasek Polytechnic Official Regulations for the exact information on the schools stand on plagiarism.
